

## Product Release Notice

### Update 1 for RTX64 3.4

---

#### General Availability Release Date

July 20, 2018

#### Product Overview

Update 1 for RTX64 3.4 is the latest update to the 64-bit version of IntervalZero's market-leading hard real-time RTX64 3.4 software product. Update 1 for RTX64 3.4 can be downloaded [here](#).

#### Features and Resolved Issue

- Resolves an issue regarding some RtDLLs and processes linked to the RT-TCP/IP Stack or Network Abstraction Layer (NAL) could not be terminated. (7165, 7058, 6947)
- Resolves a memory leak in the managed code API RTProcess.EnumerateProcesses. (7153)
- Resolves an issue regarding the ANSI version of Real-time function RtGetLicenses not returning the correct information on the licenses available on the system. (7117)
- Resolves an issue regarding Windows applications crashing if they called function RtMapMemory before RTAPI DLLMain was called. (7189)
- Resolves an issue regarding a Blue Screen occurring with message SYSTEM THREAD EXCEPTION NOT HANDLED - RtxHalExt.sys on some systems when starting RTX64 3.4 on Windows 10. (7206)

#### Activation & Licensing

Update 1 for RTX64 3.4 requires RTX64 3.4 to already be installed and licensed. The IntervalZero product licensing system allows for flexibility in how features are activated and deployed. Please [click here](#) for an overview of IntervalZero product licensing.

For additional information on deployment, please refer to the *[RTX64 Deployment Guide](#)*.

## Availability

Update 1 for RTX64 3.4 is available beginning July 20, 2018 through Partners and by contacting Sales: [sales@intervalzero.com](mailto:sales@intervalzero.com) or (781) 996-4481.

We look forward to any comments and feedback. If you have recommendations, or wish to suggest product enhancements, please contact Product Management at: [productmanagement@intervalzero.com](mailto:productmanagement@intervalzero.com).
