

RTX64 RT-TCP/IP Stack

Supported Network Interface Cards

This document provides a listing of NIC drivers that are provided with RTX64 for use with the RT-TCP/IP Stack. Note that you can write your own custom drivers for NICs that are not included in this document.

Legend

This Network Interface card (NIC) has been tested using RTX64. The card has been tested for both Internet Protocol version 4 (IPv4) and next generation Internet Protocol version 6 (IPv6).

This NIC has been tested using RTX64. The manufacturer has listed this chipset as End-Of-Life, and it will likely be deprecated in a future release of RTX64.

This NIC has not been tested, but based on its chipset it should work correctly with RTX64.

This NIC has not been tested, but based on its chipset it should work correctly with RTX64. The manufacturer has listed this chipset as End-Of-Life, and it will likely be deprecated in a future release of RTX64.

This NIC has been tested and confirmed not to work correctly with RTX64.

The device supports line-based interrupts only.

NOTE: The RT-TCP/IP Stack and RTX64 Network Abstraction Layer (NAL) currently use different drivers. See the *RTX64 NAL Supported NICs* document for a list of NAL-supported NICs.

NOTE: All drivers support Link Status monitoring.

NOTE: All tested ( , ) drivers support Jumbo Packets except the Realtek RtRtl8168 driver.

NOTE: Windows uses the Device ID and Vendor ID when associating devices. The friendly name of a device in Windows may differ slightly from the corresponding name provided in this document.

Broadcom

Driver RtBCM supports:

Vendor ID	Device ID	Device Description	Minimum RTX64 Version	Status
0x14E4	0x1682	Broadcom NetXtreme 57762 Gigabit Ethernet	RTX64 2014 with Service Pack 2	

Intel

Driver RtIPCH supports:
