

## Product Release Notice

# RTX64 2013 with Service Pack 1 and Update 2

---

### General Availability Release Date

March 28, 2014

### Product Overview

RTX64 2013 with Service Pack 1 and Update 2 is the latest 64-bit version of IntervalZero's market-leading hard real-time software products. This update provides fixes for a number of important issues. The software can be downloaded [here](#).

### Features and Resolved Issues

RTX64 2013 with Service Pack 1 and Update 2 includes the following updates:

#### Subsystem

- Resolved an issue where the real-time subsystem incorrectly frees memory during application exit when implicitly linking RTDLLs that use C Runtime and local memory. (2541)

#### RT-TCP/IP Stack and Drivers

- Resolved an issue where Critical Sections within the Intel Real-time network drivers (Rt8257x, RtE1000, and RtIGB) were not multi-process safe. (2552)

#### Tools

- Resolved an issue where the RTX64 control panel would not allow for setting custom HAL timer periods. (2539)
- Resolved an issue where the RTX64 control panel always forces a network interface to use MSI-X (2556)

## SDK

- Resolved an issue where the SDK installation would only install on Windows 7 or Windows 8. (2543)

## Installation

- Resolved an issue where the RTX64 Runtime could not install on certain non-English operating systems, such as German and French. (2542)
- Resolved an issue where uninstalling the Runtime would cause a hang if the real-time subsystem was not stopped before starting the uninstall. (2520)

## Activation & Licensing

The IntervalZero product licensing system allows for flexibility in how features are activated and deployed. Please [click here](#) for an overview of IntervalZero product licensing.

For additional information on deployment, refer to the RTX64 Deployment Guide located on the [IntervalZero web site](#).

## Availability
