

Product Release Notice

RTX64 4.5.2

General Availability Release Date

May 22, 2025

Product Overview

RTX64 4.5.2 is the latest 64-bit version of IntervalZero's market-leading hard real-time software products.

On May 13th Microsoft began rolling out Windows KB5058411 as an optional update for systems running on Windows 11 24H2. You can find more details regarding the update here: [Windows KB5058411](#)

During our monthly KB testing IntervalZero became aware of a compatibility issue between this update and RTX64 Runtime, specifically regarding OS Build 26100.4061. RTX64 4.5.2 Runtime resolves this issue allowing the RTX64 Subsystem to start and run.

This release is available as both a full RTX64 4.5.2 Runtime install, or as an Update 2 to RTX64 4.5 Runtime. It includes all fixes included in update 1 as well.

As always, we recommend that you postpone updates until IntervalZero has notified you if there are any incompatibility issues.

Availability

RTX64 4.5.2 Runtime is available beginning May 22, 2025, through Partners and by contacting Sales: sales@intervalzero.com.

We look forward to any comments and feedback. If you have any recommendations, would like to be included in the monthly KB email updates, or wish to suggest any product enhancements, please contact Product Management at: productmanagement@intervalzero.com.
