## Product Release Notice: Update 3 for RTX64 4.0

---

### General Availability Release Date

May 17, 2021

### Product Overview

Update 3 for RTX64 4.0 is the latest update to the 64-bit version of IntervalZero's market-leading hard real-time RTX64 4.0 software product. This is a cumulative update that contains all the fixes included in Update 1 and 2, along with the fixes listed below.

### Resolved Issues

- Resolves an issue where an interface for an RTX64-converted network device could not be added through the RTX64 control panel when its device-specific information—such as Hardware ID—was too long. (10002)
- Resolves an issue where the frequency by which an Ethernet Filter Driver sent a network packet was tied to the HAL timer period, which resulted in delays between transmitted packets. (9982)

### Activation & Licensing

Update 3 for RTX64 4.0 requires RTX64 4.0 to already be installed and licensed. The IntervalZero product licensing system allows for flexibility in how features are activated and deployed. Please [click here](#) for an overview of IntervalZero product licensing.

For additional information on deployment, please refer to the [RTX64 Deployment Guide](#).

### Availability

Update 3 for RTX64 4.0 is available beginning May 17, 2021 through Partners, the [IntervalZero Customer Center](#) or by contacting Sales: [sales@intervalzero.com](mailto:sales@intervalzero.com) or (781) 996-4481.

We look forward to any comments and feedback. If you have recommendations, or wish to suggest product enhancements, please contact Product Management at: [productmanagement@intervalzero.com](mailto:productmanagement@intervalzero.com).
