

Product Release Notice: Update 1 for RTX64 4.1

General Availability Release Date

May 25, 2021

Product Overview

Update 1 for RTX64 4.1 is the latest update to the 64-bit version of IntervalZero's market-leading hard real-time RTX64 4.1 software product. This update resolves the issues listed below.

Resolved Issues

- Resolves an issue where an interface for an RTX64-converted network device could not be added through the RTX64 control panel when its device-specific information—such as Hardware ID—was too long. (10003)
- Resolves an issue where the frequency by which an Ethernet Filter Driver sent a network packet was tied to the HAL timer period, which resulted in delays between transmitted packets. (9997)
- Resolves an issue where RTX64 Analyzer output System Response Time Measurement (SRTM) latency results with multiple units of measurement (milliseconds and microseconds). (9995)

Activation & Licensing

Update 1 for RTX64 4.1 requires RTX64 4.1 to already be installed and licensed. The IntervalZero product licensing system allows for flexibility in how features are activated and deployed. Please [click here](#) for an overview of IntervalZero product licensing.

Availability

Update 1 for RTX64 4.1 is available beginning May 25, 2021 through Partners, the [IntervalZero Customer Center](#) or by contacting Sales: sales@intervalzero.com or (781) 996-4481.

We look forward to any comments and feedback. If you have recommendations, or wish to suggest product enhancements, please contact Product Management at: productmanagement@intervalzero.com.
